

GODWIN ENENDU

Lagos, Nigeria | +2348139016512 | enendugodwin@gmail.com

I am a detail-oriented SOC Analyst with 3+ years of experience in monitoring, analyzing, and responding to security incidents using tools like IBM QRadar, Cortex XDR, Palo-alto firewall, Imperva DAM and WAF etc. Looking to leverage deep knowledge of SIEM, threat intelligence, and incident response in a challenging cybersecurity environment.

Core Competencies & Technical Skills:

- **Security Operations:** SOC monitoring, alert triage, incident response, log analysis
- **Data Protection:** DLP (Forcepoint, Symantec)
- **Network Security:** NAC(Forescout), IXIA network analyzer, firewall (Palo - Alto NGFW) & IDS/IPS fundamentals
- **Email Security:** Checkpoint Email security, Microsoft O365 Defender
- **Endpoint Security:** XDR (Cortex XDR), EDR (Symantec endpoint protection)
- **Monitoring & Detection:** SIEM (Elasticsearch, IBM QRadar)
- **Database & System Security:** DAM (Imperva DAM)
- **File Integrity Monitoring:** NNT Change Tracker, Cimtrak FIM
- **Automation & Orchestration:** SOAR platforms, playbook creation
- **Threat Intelligence:** IOC analysis, open-source intelligence (OSINT), threat hunting
- **Scripting & Automation:** Python, Bash, PowerShell for log parsing, automation & response
- **Networking Fundamentals:** TCP/IP, DNS, VPNs, routing & switching basics
- **Operating System Fundamentals:** Windows, Linux- system administration, Log analysis, Security hardening, Active directory.
- **Tool Deployment:** Deployment, distribution of agents, maintenances, upgrades, backups, and support for security tools such as Forescout NAC, IBM QRadar, Imperva DAM, Cortex XDR etc.

EXPERIENCES

February 2023 - Present

Security Operations Center Analyst | Guaranty Trust Bank | Lagos, Nigeria

- Monitor SIEM dashboards for suspicious activities and escalate potential incidents.
- Configure and fine-tune DLP policies to prevent sensitive data exfiltration.
- Perform NAC policy enforcement for endpoint compliance.
- Conduct database activity monitoring (DAM) to detect unauthorized access.
- Automate repetitive SOC tasks with Python and PowerShell scripts.
- Collaborate with the threat intelligence team to identify and block emerging threats.
- Developed and enforced new security policies within the Network Access Control (NAC) solution, ensuring robust access governance.
- Performed daily administration and user management on the NAC platform.
- Conducted regular reviews of compliance to NAC security rules and fine-tuned configurations to improve effectiveness.
- Admitted and configured newly joined domain systems into the secure network environment.
- Carried out patching and plugin upgrades on the NAC solution for optimal performance and security.
- Installed Database Activity Monitoring (DAM) agents across enterprise databases and defined audit and security policies.

- Executed OS and patch upgrades on DAM appliances, ensuring continued compliance and performance.
- Monitored antivirus and patch compliance across endpoints and servers, generating regular reports.
- Reviewed malware detection logs on endpoint protection platforms to identify and escalate threats.
- Tracked activities of users (e.g., tellers) accessing multiple branches on BASIS, reporting anomalies.
- Monitored and fine-tuned correlation rules based on security events from NGFW, DAM, WAF, FIM, SIEM, SOAR, and XDR.
- Analyzed security incidents flagged on XDR platforms and ensured timely response or escalation.
- Reviewed security policy violations, such as password sharing and concurrent logins, ensuring compliance.
- Monitored firewall rule changes using firewall analyzer tools to detect unauthorized configuration changes.
- Ensured security baseline compliance of network devices using ManageEngine.
- Administered and maintained enterprise security tools including SIEM, FIM, NGFW, and NAC.
- Managed URL filtering and IP blacklisting on NGFW to prevent access to malicious resources.
- Monitored domain-joined systems and regularly reviewed access and error logs on critical servers.
- Coordinated with MSSPs to align SOC operations with threat intelligence and incident response goals.
- Generated and submitted daily security reports to IT Audit for compliance and oversight.
- Continuously refined and updated correlation rules across all monitored platforms for improved threat detection.

December 2021 – December 2022

Internship | Reftek Consulting | Lagos, Nigeria

- Responsive web development using tailwind and react.

January 2020 – April 2020

Information Technology Intern | Bi-Courtney Aviation Services| Lagos, Nigeria

- Troubleshooting hardware and software issues.
- OS installations, Updates, and patch management.
- Printer and peripheral devices configuration/support.

EDUCATION

June 2017 – June 2021

Bachelor of Science - Computer Science | Babcock University, Ilishan-Remo, Nigeria.

CERTIFICATIONS

- Associate of (ISC)²
- ISO 22301:2019 - business continuity management system- Lead Implementer
- Sy0-701 CompTIA Security+
- Certified cybersecurity Educator professional (CCEP)

PROJECTS

- Threat Reputation Checker Via Virus total API.
- Automation of GTI inputs for monthly audit report.
- Automated firefighting Robot using Arduino uno

SKILLS

- Python for automation and scripting
- PowerShell | Bash for automation and scripting
- Linux for security and tool deployment
- Threat Detection and response
- Incident investigation and reporting
- Malware Analysis Basics
- Windows Fundamentals
- Familiarity with various security tools like NAC, DAM, SIEM, WAF, DLP , NGFW , Email security and SOAR
